

PLASMA SPRAY PROCESSORS

WORK INSTRUCTION

Maintenance of Equipments

Document No.	WI-QMS-11	Version	00 / 01-Apr-2019
Title	Maintenance of Equipments		
Process Owner	DH Maintenance	Effective Date	01-Apr-2019
ISO 9001:2015 Clause	7.1.3		

1. Purpose

To ensure all machines and auxiliary equipment are set right after a breakdown, and to prevent breakdowns.

2. Scope

This instruction is applicable for breakdown maintenance of all machines and auxiliary equipment, and for preventive maintenance of selected major machines.

3. Responsibility

DH Maintenance is responsible for implementing this work instruction.

4. Input

- List of machinery (QF/MAINT-01)
- Preventive maintenance schedule
- Information of breakdown

5. Work Instruction

5.1 Breakdown Maintenance

1. Concerned operators shall intimate the breakdown of a machine / equipment to DH Maintenance verbally. The service engineer shall check and verify the breakdown machine.
2. DH Maintenance / Operator inspects the machine, analyses the fault, and repairs the machine.
3. After maintenance, the production supervisor shall check the operation of the machine.
4. Total breakdown time per month is monitored, and necessary actions are initiated for repetitive breakdowns, if any. DH Maintenance shall maintain records of breakdown in the breakdown register, covering activities completed and major parts replaced.

5.2 Preventive Maintenance

1. Preventive maintenance is carried out for selected machines as per the preventive maintenance plan-cum-record.
2. Machine operators should carry out cleaning, oiling and greasing every day before starting work.
3. DH Maintenance shall record completion of activities as per the preventive maintenance plan.

5.3 General Instructions

- 5.3. Required spares for maintenance shall be purchased as and when required.
- 5.4. If required, for breakdown and preventive maintenance, help from outside agencies will be taken. Maintenance personnel shall inspect and assess the work done by outside agencies.
- 5.5. Yearly testing of compressors shall be carried out, and records shall be kept on file.

6. Output and Effectiveness Monitoring

Records of preventive and breakdown maintenance activities are maintained. Timely completion of maintenance activities is monitored. A minimum percentage of machine breakdown indicates the effectiveness of the process.

7. Records

Sl. No.	Record Title	Format No.	Retention Period	Retention Resp.	Indexing Method
1	List of Machines & Equipment	QF/MAINT/01	Till Rev.	Head Maint.	Computer / Format
2	Machine Break Down Report	QF/MAINT/05	1 Year	Head Maint.	Computer / Hard copy
3	Preventive Maintenance	QF/MAINT/03	1 Year	Head Maint.	Computer / Hard copy
4	Yearly Preventive Maintenance Plan	QF/MAINT/02	1 Year	Head Maint.	Computer / Hard copy
5	Periodic Overhaul Plan	QF/MAINT/07	1 Year	Head Maint.	Computer / Hard copy
6	List of Spares	QF/MAINT/04	1 Year	DH QA	Computer / Hard copy
7	Machine Overhaul Record	QF/MAINT/08	3 Years	Head Maint.	Computer / Hard copy

Disposition: Shred / Delete
