

ISO Clause : 7.5, 7.5.1, 7.5.2, 7.5.3, 7.5.3.1, 7.5.3.2

Objective (Aim)	☺	Establishing necessary documented information for effective quality management systems
	☺	Ensuring the updating of documentation and controlling the documented information
Scope	☺	Controlling the documented information
Process owner	☺	Dept. Head

Risk Considered

- 1) Inadequate documented information
- 2) Use of uncontrolled documents
- 3) Use of obsolete documents without approval
- 4) Loss of documented information

Procedure:

Documented information

Plasma Spray Processors. quality management system has included the documented information required by the International standard, documented information determined by the organization as being necessary for the effectiveness of the quality management system.

Plasma Spray Processors. has established and maintained documented information as Quality management system procedures for each process with turtle diagram and Process flow diagram.

Plasma Spray Processors. has also listed down the maintained documents and retained documents in Master list of documents& records QF/QMS/07.

Creating and updating documented information.

a) Identification of documented Information:

Quality Management System Procedures

QMS-XX

QMS - Quality management system

XX - Running Number

Maintained documented Information (Document)

ISO Clause : 7.5, 7.5.1, 7.5.2, 7.5.3, 7.5.3.1, 7.5.3.2

XX-XX-XX

XX –Quality Format

XX- Department

XX - Running number/ Sr. No.

Retained documented Information (Format/Record)

XX-XX-XX

XX –Quality Format

XX - Department

XX - Running number/ Sr. No.

Work Instruction

XX-XX

Example

WSV 01 - Indicates 1st work instruction of repair

Process Flow Diagram

XX-XX- XX

PFD–Process Flow Diagram

XX- Department

XX–Sr. No.

ISO Clause : 7.5, 7.5.1, 7.5.2, 7.5.3, 7.5.3.1, 7.5.3.2

Review and Approval of documented information

Sl.No	Description of document	Format	Media	Review	Approval
01	QMS Procedures	English	Hard copy / Electronic media/ MS office	QMSR	PARTNER
02	Quality Policy	English	Hard copy / Electronic media/ MS office	QMS	PARTNER
03	Department Quality objectives	English	Hard copy / Electronic media/ MS office	Dept . Head	PARTNER
04	Organizational Quality objectives	English	Hard copy / Electronic media/ MS office	QMSR	PARTNER
05	Scope of the organization	English	Hard copy / Electronic media/ MS office	QMSR	PARTNER
06	Work instructions / Standard operating procedures (if any)	English / Hindi / Marathi	Hard copy / Electronic media/ MS office	Dept I/C	PARTNER
06	Process Flow Diagram & Quality Plan	English	Hard copy / Electronic media/ MS office	Dept . Head QA	PARTNER

Documents and Records in ERP/Soft Copy or using software MS office:

For each product list of all components, their suppliers and quantity are entered in Inward Register. Also, approved supplier list along with all details including TIN Number, GST registration number and Tax structure is created in Supplier Master (Registration form). As and when order is received, it is entered in Inward Register. Manually raise purchase request and purchase orders are generated manually, for all components quality plan is created. The record of verification of parameters for each component is entered against quality plan / purchase order by QA and GRN is created. DH Purchase / DH Store have overall control for this process.

S.No	Domain	Password controller
1	Entry of Approved supplier data	Purchase I/C
2	Quality Plan / Quality planning documents/ insp . checklist Entry	QA
3	Purchase order – Entry	Purchase In charge
4	Purchase order – confirm	PARTNER
5	GRN – Entry	DH Store
6	GRN – Confirm	Purchase In charge

ISO Clause : 7.5, 7.5.1, 7.5.2, 7.5.3, 7.5.3.1, 7.5.3.2

7	Inspection report – Entry	QA Eng.
8	Inspection Report – Confirm	QA Eng.
9	Operation & Service Order release	Production I/C
10	Report Production	Production I/C
11	Customer Order – Entry	Mkt. / Sales I/C
12	CO – Confirm	PARTNER
13	Bill – Entry	DH Accounts
14	Bill – Confirm	DH Accounts
15	Planning	Purchase I/C
16	PR Release from planning	Purchase I/C
17	All above	PARTNER

Control of documented information (CHECKLIST, JOB CARD, PROCESS FLOW, QUALITY PLAN)

Documented information required by the quality management system is controlled as per the procedure given below

- 1) Assign unique no. to Quality Plan & Checklist as : QP No., QP for Matl. & Sr. no.
- 2) Initially assign version status as: Rev. 0. If revised change version status to next no. e.g. 0 becomes 1
- 3) Prepare a Master list of customer drawings & external origin documents identifying the latest version status, date and controlled copy holders.
- 4) Maintain a master copy by stamping it as “MASTER COPY” in BLUE on the Front Side of the Document. Issue photocopy to concerned persons by stamping it as ‘Controlled Copy’ in Red on the Front Side of the Document.
- 5) For any changes in **the Checklist & Quality Plan**; propose the changes to DH (QA) by giving the details and reasons of changes by recording those in a register. Approving authority reviews the same and if accepted the changes are incorporated.
- 6) Provide the amended copy to C.C. holders. In case of amendments, inform C.C. holders to destroy all superseded copies.

Control of documented information (QMS Documentation, Formats, Work Instructions)

Initially assign version status as: Rev.0.

- **Controlled Copy:** Document which has to be retrieved when there is any change in it for revision or it, becomes obsolete, is defined as Controlled Copy.
[Controlled documents shall be identified with a rubber stamp of ‘Controlled Copy’ in BLUE, on all pages of the set of documents.]
- **Uncontrolled Copy:** Document given to anyone which need not be retrieved for revision, is defined as Uncontrolled Copy. E.g. quality manual copy given to customer.

ISO Clause : 7.5, 7.5.1, 7.5.2, 7.5.3, 7.5.3.1, 7.5.3.2

[Uncontrolled documents shall be identified with a rubber stamp of 'Uncontrolled Copy 'in BLUE, on all pages of the set of documents.]

- **Master Copy:** Original / First copy of any document is defined as Master Copy.
[It is stamped in BLUE. Master Copy shall be used for making controlled copies or uncontrolled copies.]

- **Obsolete Copy:**
Document which is not valid for use is defined as Obsolete Copy.

[It is stamped in RED.]

- 1) If revised change version status to next no. e.g. 0 becomes 1
- 2) Prepare a Master list of all formats in a department identifying the latest version no. & date, controlled copy holders for lists, and record control details of forms and registers.
- 3) Maintain specimen copy of each latest format in use for verifying the latest status by stamping it "Master Copy" in Blue on the Front Side of the Format
- 4) Issue photocopies of formats for use; on which no stamp is affixed.
- 5) For any changes in the Formats; propose the changes to QMSR by giving the details and reasons of changes by recording those in a register. Approving authority reviews the same and if accepted the changes are incorporated.
- 6) Provide the amended copy to concerned person's / C.C. holders. Inform them to destroy all superseded copies.
- 7) Stamp Master copy of obsolete formats with "OBSOLETE COPY" stamp in red and keep for reference, if required.
- 8) For the 10th version in any section; the QMS is reissued by resetting all rev. nos. (e.g. 2.9 When version becomes 3.0 and all other section nos. irrespective of their revision status will be revised to 3.0) Revision record sheet also resets when issue no. changes And for the rev. of entire manual, the manual is reissued by resetting all rev. nos. (e.g. Rev. no. Will be reset 00 & issue no. 02)

Current version of Quality management system of each section in Issue 01, Ver.00, dt. 01.04.2018

- Suitable version of documented information is available to the user and this is ensured through document distribution record **QF/QMS/03**. The distribution of documented information is based on the need and request from user.
- Change required in any documented information will be communicated through QMS Change Note **QF/QMS/04**; changes will be done as per the guideline given in procedure for Planning of change & Control **QMS-10**
- Documented information maintained in electronic media will be protected through periodical backup system and control over accessibility by using appropriate password system. Documented information maintained as hard copy will be filed and kept in racks and bookshelf. Wherever necessary locks are provided to prevent the loss of documented information.

ISO Clause : 7.5, 7.5.1, 7.5.2, 7.5.3, 7.5.3.1, 7.5.3.2

- Distribution of all documented information is controlled through Document distribution register QF/QMS/03. Documented information available in each process are addressed in QMS procedure for easy retrieval.
- Retention of documented information is addressed in Master list of records **QF/QMS/07**. Disposal of documented information will be decided by dept I/C whenever it is planned.
- Documents received from the customers, Documents purchased from standardization agencies and product catalog received from supplier is updated in list of external documents **QF/QMS/15**. Availability of Latest version of External Documents are verified once a year by visiting the document issuing agency (or) by telephonic enquiry with agency (or) by sending an enquiry letter to the agency by the I/C dept. If revised copy is available with the agency, it is procured and the list of external origin document is revised by the respective I/C dept. List of external documents are maintained I/C dept. for their process.
- Documented information retained as evidence of conformity is protected from unintended alterations. This is ensured by reviewing and approving the records periodically by I/C depts.

The company's Quality Management System is documented information in four levels, which covers the entire scope for which registration is sought.

***Level 1: Documented Information (QMS):** The main contents of the apex document are.....

1. Scope of the Quality Management System
2. Details of ISO 9001-2015 clause applicability and its justification
3. Process Identification & Interaction
4. Organization chart
5. Responsibilities & authorities
6. Quality Policy & Objectives
7. Process flow charts

***Level 2: Work Instructions:**

It Includes formal products & Process information for down the level person like operators in their local language.

***Level 3: Formats:** It includes following documents which are used for planning, implementation and control of the organization

1. Forms & Formats
2. Lists

A specimen copy is kept with MR to control approval, issue and changes.

***Level 4: Retain Documented Information :**

Retain documented information generated as a result of implementing an activity / procedure are filled in the above relevant as defined in master list of formats QF/QMS/07.

ISO Clause : 7.5, 7.5.1, 7.5.2, 7.5.3, 7.5.3.1, 7.5.3.2

The above levels of documentation are supported by.....

1. Product documents (Drawings, Specifications, QAP, Checklist, Quality Plans & monitoring records)
2. National & international stds.(ISO)

Quality Objectives

Sl.No	Objective parameter	Target	Monitoring method	Monitoring frequency	Responsibility
1	Number of non-conformance related to documented information control	Zero	Internal audit result	Once in 6 months	DEPT HEAD
